

**January 1, 2013**

**Here's hoping that everyone has had a good Christmas holiday and New Year's Eve. Stay safe and get ready for another great year of street rodding with meetings, "bench racing", Northeast Street Rod Nationals *plus* and some cruisin' too! Hopefully everyone got at least one street rod item for Christmas or perhaps some money to buy yourself something for your favorite ride.**

**January Club Meeting** We will be having our January club meeting at former club member Donny Clark's machine shop in Vergennes. He will demo a computerized machine that cuts designs in metal. Gather **Saturday morning January 12** at Aubuchon Hardware in Vergennes at **9:30 AM**. Stan will lead the way to Donny's shop. From the north go south on Rt 7 to the 4 way traffic light at the intersection of Monkton Road & Rt 7. Turn right, then turn right into the shopping center. Please call or email Art or Harold if you are going to attend. We will head out as soon as everyone who has called is there. If you are running late call Harold's cell phone at 922-6293.

**Other Winter Meetings** February's meeting will be at Vermont Custom Auto in South Burlington. We are still working on March's meeting but we are hoping to go to RPM in Georgia. Future newsletters will have further mation.

**Midwinter Party** It is time once again to think about our annual CVSR Midwinter Party. We have gone to 158 Main Street in Jeffersonville for several years now. Be thinking about whether you would like to go there again or try another place. We will bring this subject up at the January meeting.

**Club Dues** If you have not paid your club dues for the 2012 to October 2013 date please send them to Dan or give them to a club officer at the January meeting coming up.

**Charlie's '37** Former CVSR member Charlie Richer has his '37 Plymouth over at Art's garage for the winter for lots of upgrading. Charlie and Art spend most weekday afternoons on the rod. It needs lots of things done to improve handling and general performance. So far there is a new steering column, steering wheel, rack and pinion and the u-joints, shafts and bearing support to tie it all together. There will be a new intake manifold, carburetor, seat riser, and a KwikWire total wiring system among other upgrades. Feel free to drop by any time to check out the progress of the project.

**Irene's '56** Irene Daigle reports that the '56 Chevrolet pickup that we worked on as a club winter project a year ago is all painted and lookin' good! We have been invited to go to her (new) home in Milton some time in the spring or summer to check it out. Perhaps we can make a special trip as a club outing or cruise.

**Cruisin' Radio 93.7 FM** We seem to equate the old cars with old music. Often we hear nostalgia music at rod runs and car shows. FYI the local area has a cool radio station at 93.7 FM on your radio dial. Lots of music from the

old days such as The Beach Boys, Buddy Holly and Jan and Dean. Mostly music with no disc jockey and very few commercials. They even call it “Cruisin 93.7”. Check it out!
